WORK EXPERIENCE

August 2024 – Present

Best Buy, Bayshore, NY – Sales Advisor

- Provided expert product knowledge to customers, guiding them in selecting the best electronics and home appliances based on their needs and preferences.
- Managed daily sales transactions and maintained accurate records through the store's point-of-sale system.
- Troubleshooted basic technical issues and recommended service solutions, enhancing the overall customer experience.

February 2024 – June 2024

Day & Nite All Service, New Hyde Park, NY – Software Developer & IT Intern

- **Developed Azure app registrations:** Utilized JavaScript to integrate with Microsoft's Graph API and Azure Active Directory, enhancing app communication and authentication efficiency.
- **Created Power Automate Flows:** Designed and implemented both cloud and desktop flows to optimize onboarding and offboarding processes.
- **Engineered software for work order logging:** Collaborated with teammates to develop software leveraging Graph API, custom REST API endpoints, JSON structured data, SQL Database, Strapi, and cloud servers.
- **Hosted a Discourse forum:** Utilized an AWS LightSail server with Ubuntu, Node.js, and Apache to host a Discourse forum, facilitating Q&As and creating a community of knowledge within the company.
- **Provided technical support:** Offered comprehensive support for employees, resolving issues related to connectivity, software, and hardware across various devices (PCs, printers, routers, monitors, phones).
- **Managed device asset inventory:** Used Asset Tiger for asset management and AirWatch to maintain work phone connections.
- **Created Notion documentation:** Developed detailed documentation of processes, development, and tutorials within Notion for both department and company-wide use.

EDUCATION

September 2021 - PRESENT

B.S. Degree in Computer Science, Farmingdale State College, Farmingdale, NY - 3.37/4.0 GPA, Dean's List.

Relevant Courses: Mobile Applications Dev, Advanced Programing, Data Structures & Algorithms II, Computer Architecture.

PROJECTS

LightWeight – One-Stop Fitness App – Project Manager

- **Led the development of a mobile app providing fitness routines, nutrition education, and weight tracking for college students using Firebase, Wger API, and EDAMAM API.**
- Managed a team of developers, overseeing task assignments, timelines, and the integration of **Jetpack Compose** for a user-friendly interface.
- Ensured the project aligned with its mission to deliver affordable and accessible tools to optimize student health and well-being.

Serenity – Lower Stress

- **Managed and maintained a GitHub repository for the Serenity project, ensuring version control and facilitating collaborative contributions within the development team.**
- Developed the back-end in Java and the front-end using JavaFX, performing JUnit testing and debugging to ensure alignment with the SRS document.
